DEPARTMENT OF AGRICULTURE  
OFFICE OF THE SECRETARY  
PRIVACY ACT OF 1974

Systems of Records; Annual Publication

Pursuant to 5 U.S.C. § 552a(e)(4), the Department of Agriculture (USDA) hereby republishes its annual notice of the existence and character of the systems of records currently maintained pursuant to the Privacy Act of 1974. The last such annual republication was at 41 Fed. Reg. 39195 (Sept. 14, 1976). Interim amendments, revisions, and system deletions have been published at: 41 Fed. Reg. 34089 (Aug. 12, 1976); 41 Fed. Reg. 47400 (Oct. 28, 1976); 42 Fed. Reg. 6195 (Feb. 1, 1977); 42 Fed. Reg. 22133 (Apr. 29, 1977); 42 Fed. Reg. 25515 (May 18, 1977); 42 Fed. Reg. 27190 (May 26, 1977).

There are numerous minor revisions in USDA's system notices (e.g., address changes, and changes in titles of system managers) necessitated by changes in agency organization. There are no changes in the routine use section of any existing system notice.

The following systems of records are being deleted in this year's republication for the reasons stated:

USDA/AMS—2, Milk Market Administrators (MMA)—Personnel and Payroll System: separate system notice not needed as these records are included within Department-wide system USDA/OP—1.

USDA/ACSC—10, Defense Executive Reserve File: the system is no longer maintained and all existing records have been destroyed.

USDA/ASCS—26, Rice Cross Compliance System: records no longer collected or maintained; all existing records have been destroyed. USDA/APHIS—1, Meat and Poultry Inspection Program—Slaughter Processing and Allied Industries Compliance Records System: records and functions which generate them have been transferred to a new agency, the Food Safety and Quality Service. The new system will be designated USDA-FSQS—1.

USDA/ERS—2, Rappahannock Land Information System: the records in the system were comprised entirely of a study which has now been completed; all records in the system have been destroyed.

USDA/FCS—2, Ohio Livestock Producers Survey: the records in the system were comprised entirely of a one-time study which has now been completed; all records in the system have been destroyed.

USDA/FNS—6, Personnel Security Clearance Status Files: separate system notice not needed as these records are included within Department-wide system USDA/OP—2.

USDA/FS—3, Casual Firefighter Data: separate system notice not needed as these records are included within Department-wide system USDA/OP—1.

USDA/SRS—6, Telephone, Electric and L. P. Gas Services Survey: the information contained therein is no longer collected or maintained; all records in the system have been destroyed.

Below are listed notices of systems of records which have not previously been published in the Federal Register. These are not new systems of records, for the categories of records and individuals covered by these systems were previously within existing systems of records. Their description as a separate system of records has been necessitated by organizational changes within the component agencies of USDA.

USDA/FGIS—1, Employment History Records for Licensed Non-federal Employees: The Federal Grain Inspection Service (FGIS) is a new agency which was created in October 1976, by separating its functions from those of the Agricultural Marketing Service (AMS). The records and individuals covered by this system were previously included within USDA/AMS—1.

USDA/FGIS—2, Court cases brought by the Government pursuant to the Agricultural Marketing Act of 1946, as amended, or the United States Grain Standards Act, as amended: See discussion for USDA/FGIS—1. The records and individuals covered by this system were previously included within USDA/AMS—6.

USDA/FGIS—3, Subsidiary Personnel and Pay Records: See discussion for USDA/FGIS—1. The records and individuals covered by this system were previously included within USDA/AMS—8.

USDA/FSQS—1, Meat and Poultry Inspection Program—Slaughter, Processing and Allied Industries Compliance Records System: The Food Safety and Quality Service (FSQS) was created in June, 1977, through an internal reorganization. It is comprised of personnel, and performs functions, previously assigned to the Animal and Plant Health Inspection Service (APHIS) and the Agricultural Marketing Service (AMS). This system of records was previously designated USDA/APHIS—1, which is being deleted in this republication.

USDA/FSQS—2, Employment History Records for Licensed Non-

federal Employees: See discussion for USDA/FSQS—1. The records and individuals covered by this system were previously included within USDA/AMS—1.

USDA/FSQS—3, Court cases brought by the Government pursuant to the following Acts: Agricultural Marketing Act of 1946, Egg Products Inspection Act, Agricultural Fair Practices Act: See discussion for USDA/FSQS—1. The records and individuals covered by this system were previously included within USDA/AMS—6.

USDA/OGC—76, Cases by and against the Department under the Virus-Serum Toxin Act: Responsibility within the Office of the General Counsel was previously assigned to the Marketing Division, but has recently been shifted to the Animal and Plant Health Inspection Service Division, thus necessitating publication of a separate system notice. The records and individuals covered by this system were previously included within USDA/OGC—33.

The following system notice of a new system of records has not been previously published in the Federal Register. A New System Report has previously been submitted in accordance with 5 U.S.C. sec. 552a(o) and OMB—Circular A—108.

USDA/AUDIT—3, Audit Information System: this system contains various records relating to participants in various USDA farms, food, loan, and research programs. The principal purpose of these records is use by the Office of Audit in conducting audits of these programs.

Although the Privacy Act requires only that the portion of each system notice which describes that system's "routine use" be published for public comment, USDA invites such comment on all portions of the system notices not previously published in the Federal Register, as well as on all system notices herein republished.

Interested persons may submit written comments to: Director, Research and Operations Division, Office of the General Counsel, U.S. Department of Agriculture, Washington, D.C. 20250, on or before October 31, 1977. All comments submitted will be available for public inspection during regular business hours in Room 2321 of the South Building, USDA, 12th Street and Independence Avenue, SW., Washington, D.C.

The notices of systems of records not previously published in the Federal Register will be adopted without further publication as set forth below October 1, 1977, unless modified by a subsequent notice to incorporate comments received from the public.

Dated: August 29, 1977.

Bob Bergland,  
Secretary.

Note: Systems of records for the Agriculture Department are current as of August 29, 1977.

#### USDA/OI-3

**System name:** Investigative Files and Subject/Title Index, USDA/OI

**System location:** In the Headquarters Office in the Agriculture Administration Building, 14th and Independence Ave., S.W., Washington, D.C. 20250, and in the field offices set forth in the system of records designated USDA/OI.

Except for inadvertent errors, all entries in regional indexes (at the first seven field offices listed in USDA/OI-1) are duplicated in the Headquarters index. Thus the Headquarters index is the only complete index in OI. The Headquarters files also contain a copy of every OI investigative report, but not the correspondence in all cases. Older investigative files of each OI office may have to be retrieved from Federal Records Centers when needed.

**Categories of individuals covered by the system:** The individual names in the OI index fall into one or more of the following categories:

**Subjects:** These are applicants for OI employment or individuals against whom allegations of wrongdoing have been made. In some instances, these individuals have been the subjects of investigations conducted to establish whether allegations were true. In other instances, the allegations were deemed to frivolous or indefinite to warrant inquiry.

**Principals:** These are individuals who are not named subjects of investigative inquiries, but may be responsible for alleged violations. For example, the president of a firm alleged to have violated laws or regulations would likely be individually listed in the OI index.

**Complainants:** These are individuals who allege wrongdoing, mismanagement, or unfair treatment relating to USDA employees and/or programs.

**Others:** These are all other individuals closely connected with a matter of investigative interest or whose names have been checked through the index to determine whether they were of record. Among these names are those of people who are connected with a matter only in that they have shown unusual interest in having allegations investigated or in learning the results of investigation. Also included in the index are the names of persons on the Department of Justice crime list.

**Categories of records in the system:** The OI Subject/Title Index and Investigative Files consist of:

### Systems of Records; Annual Publication

Pursuant to section 3(e)(4) of the Privacy Act of 1974 (5 U.S.C. 552a(e)(4)), attached is the annual compilation of notices of the systems of records maintained by the Department of Justice. This document incorporates all published changes and additions to the Department's systems notices which have been published and adopted since the 1976 compilation (41 FR 39916, September 16, 1976), and also corrects omissions, spelling and typographical errors, and makes other necessary editorial changes. In some systems, system managers and addresses have been changed to reflect internal reorganizations of the Department of Justice.

Following is a list of major or substantive changes that have been made to the systems since the 1976 compilation:

(a) Four systems have been deleted. JUSTICE/OSG—001, Attorney Assignment Reports are no longer maintained by the Department of Justice as their use has been discontinued by the Office of the Solicitor General. JUSTICE/WSPF—001 and 002 were transferred to the Archivist of the United States upon termination of the Office of the Watergate Special Prosecution Force. JUSTICE/WSPF—003 has been destroyed as these records were duplicative of records maintained elsewhere in the Department of Justice.

(b) JUSTICE/ATR—009, Consumer Inquiry Index: A new routine use was adopted effective April 25, 1977. (42 FR 22953)

(d) JUSTICE/CIV—001, Civil Division Case File System was divided into three separate systems to describe more accurately the categories of records, the routine uses and the methods of access. The new systems are CIV—001, Civil Division Case File System, CIV—002, Civil Division Case File System—Customs Section, and CIV—003, Office of Alien Property Case File System. (42 FR 23558)

(e) JUSTICE/CRM—999, Appendix to Criminal Division System of Records: Field Offices of the Organized Crime and Racketeering Section: Four locations for the maintenance of records were deleted and the records transferred to the U.S. Attorneys within those districts. (42 FR 1311)

(f) Due to a reorganization of the Department of Justice, 12 systems were transferred from the Office of the Deputy Attorney General to the Office of the Associate Attorney General, and two DAG systems were renumbered. JUSTICE/DAG—001 is now AAG—001, DAG—002 is now AAG—002, DAG—005 is now AAG—003, DAG—006 is now AAG—004, DAG—007 is now AAG—005, DAG—008 is now AAG—006, DAG—009 is now AAG—007, DAG—010 is now AAG—008, DAG—011 is now AAG—009, DAG—012 is now AAG—010, DAG—013 is now AAG—011, DAG—014 is now AAG—012, DAG—003 is now DAG—001, DAG—004 is now DAG—002. In the interests of effective law enforcement, this information is retained in order to establish patterns of criminal activity and to assist other law enforcement agencies that are charged with enforcing other segments of criminal law. Therefore, under certain limited circumstances, individuals known, suspected, or alleged to be involved in non-narcotic or non-alien criminal activity may be subject to a file maintained in this system.

**Categories of records in the system:** In general, this system contains computerized and manual intelligence information gathered from DEA and INS investigative records and reports. Specifically, intelligence information is gathered and collated from the following DEA and INS records and reports: (1) DEA Reports of Investigation (DEA-6), (2) DEA and INS Intelligence Reports, (3) INS Air Detail Office Index (I-92A), (4) INS Anti-Smuggling Indices (G-170), (5) INS Marine Intelligence Index, (6) INS Fraudulent Document Center Index, (7) INS Terrorist Index, and (8) INS Reports of Investigation and Apprehension (I-44, I-213, G-166).

**Authority for maintenance of the system:** This system has been established in order for DEA and INS to carry out their law enforcement, regulatory, and intelligence functions mandated by the Comprehensive Drug Abuse Prevention and Control Act of 1970 (84 Stat. 1236), Reorganization Plan No. 2 of 1973, the Single Convention on Narcotic Drugs, (18 U.S.T. 1407), and Sections 103, 265, and 290 and Title III of the Immigration and Nationality Act, as amended, (8 U.S.C. 1103, 1305, 1360, 1401 et seq.). Additional authority is derived from Treaties, Statutes, Executive Orders and Presidential Proclamations which DEA and INS have been charged with administering.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** This system will be used to produce association and link analysis reports and such special reports as required by intelligence analysts of DEA and INS. The system will also be used to provide 'real-time' responses to queries from Federal, state, and local agencies charged with border law enforcement responsibilities.

Information from this system will be provided to the following categories of users for law enforcement and intelligence purposes provided a legitimate and lawful 'need to know' is demonstrated: (a) Other Federal law enforcement agencies, (b) state and local law enforcement agencies, (c) foreign law enforcement agencies with whom DEA and INS maintain liaison, (d) U.S. intelligence and military intelligence agencies involved in border criminal law enforcement, (e) clerks and judges of courts exercising appropriate jurisdiction over subject matter maintained within this system, and (f) in the event there is an indication of a violation or potential violation of law whether civil, criminal, regulatory, or administrative in nature, the relevant information may be referred to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulations, or order issued pursuant thereto.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Manual subsets of the Pathfinder Information System are maintained on standard index cards and manual folders. Standard security formats are employed.

The automated Pathfinder Information System is stored on digital computers in the Drug Enforcement Administration Office of Intelligence Secured Computer facilities located at DEA Headquarters and El Paso, Texas.

**Retrievability:** Access to individual records can be accomplished by reference to either the manual indices or the automated information system. Access is achieved by reference to personal identifiers, other data elements or any combination thereof.

**Safeguards:** The Pathfinder System of Records is protected by both physical security methods and dissemination and access controls. Fundamental in all cases is that access to intelligence information is limited to those persons or agencies with a demonstrated and lawful need to know for the information in order to perform assigned functions.

Physical security when intelligence files are attended is provided by responsible DEA and INS employees. Physical security when files are unattended is provided by the secure locking of material in approved containers or facilities. The selection of containers or facilities is made in consideration of the sensitivity or National Security Classification, as appropriate, of the files, and the extent of security guard and/or surveillance afforded by electronic means.

Protection of the automated information system is provided by physical, procedural, and electronic means. The master file resides in the DEA Office of Intelligence Secured Computer System and is physically attended or safe-guarded on a full time basis. Access or observation to active telecommunications terminals is limited to those with a demonstrated need to know for retrieval information.

Surveillance access to an unattended terminal is precluded by a complex authentication procedure. The procedure is provided only to authorized DEA and INS employees. Transmission from DEA Headquarters to El Paso, Texas is accomplished via a dedicated secured line.

An automated log of queries is maintained for each terminal. Improper procedure results in no access and under certain conditions completely locks out the terminal pending restoration by the master controller at DEA Headquarters after appropriate verification. Unattended terminals are otherwise located in locked facilities after normal working hours.

The dissemination of intelligence information to an individual outside the Department of Justice is made in accordance with the routine uses as described herein and otherwise in accordance with conditions of disclosure prescribed in the Privacy Act. The need to know is determined in both cases by DEA and INS as a prerequisite to the release of information.

**Retention and disposal:** Records maintained within this system are retained for fifty-five (55) years.

**System manager(s) and address:** Assistant Administrator for Intelligence, Drug Enforcement Administration, 1405 Eye Street, N.W., Washington, D.C. 20537 and Associate Commissioner, Management, Immigration and Naturalization Service, 425 Eye Street, N.W., Washington, D.C. 20536.

## JUSTICE/DEA - 008

**System name:** Investigative Reporting and Filing System

- B. Alleged drug offenders.
- C. Persons suspected of drug offenses.
- D. Confidential informants.
- E. Defendants.
- F. Witness.

V 4 2 1 9 0 S E P 3 0 7 7

G. Non-implicated persons with pertinent knowledge of some circumstance or aspect of a case or suspect. These are pertinent references of fact developed by personal interview or third party interview and are recorded as a matter for which a probable need for recall will exist. In the regulatory portion of the system, records are maintained on the following categories of individuals: A) Individuals registered with DEA under the Comprehensive Drug Abuse Prevention and Control Act of 1970; B) Responsible officials of business firms registered with DEA; C) Employees of DEA registrants who handle controlled substances or occupy positions of trust related to the handling of controlled substances; D) Applicants for DEA registration and their responsible employees.

**Categories of records in the system:** The Investigative Reporting and Filing System includes, among other things, a system of records as defined in the Privacy Act of 1974. Individual records, i.e., items of information on an individual may be decentralized in separate investigative file folders. Such records as well as certain other records on persons and subjects not covered by the act, are made retrievable and are retrieved by reference to the following sub-systems.

A. The Narcotics and Dangerous Drugs Information (NADDIS) is a central automated index maintained by DEA Headquarters. It is accessible by the telecommunication means of appropriately equipped DEA headquarters and field offices. The index record contains names and selected items of information extracted from investigative reports. Direct references to the discrete file folders in which the source reports are filed are provided, therefore, the records point to the more comprehensive manual reports. The central index reflects records maintained at all DEA echelons. Records are retrievable by name and by certain identifying numbers.

B. Manual name indices covering regional and district investigative activities are maintained by DEA field offices. A residual card index is retained at DEA headquarters that predates the automated central index. The items of information on the manual index records are extracted only from investigative reports and point to the more comprehensive information in pertinent investigative file folders. The records in the field office indices are subsets of the central automated and manual indices. Records are retrievable by name only by this manual technique. Four basic categories of files are maintained within the Investigative Reporting and Filing System. DEA does not maintain a dossier type file in the traditional sense on an individual. Instead, the files are compiled on separate investigations, topics and on a functional basis for oversight and investigative support. A) Criminal Investigative Case Files, B) General Investigative Files, Criminal and Regulatory, C) Regulatory Audit and Investigative Files, D) Confidential Informant Files.

The basic document contained in these files is a multi-purpose report of investigation (DEA-6) on which investigative activities and findings are rigorously documented. The reports pertain to the full range of DEA criminal drug enforcement and regulatory investigative functions that emanate from the Comprehensive Drug Prevention and Control Act of 1970. Within the categories of files listed above, the general file category includes preliminary investigations of a criminal nature, certain topical or functional aggregations and reports of pre-registrant inspections/investigations. The case files cover targeted conspiracies, trafficking situations and formal regulatory audits and investigations. Frequently the criminal drug cases are the logical extension of one or more preliminary investigations. The distinction between the case file and general file categories, therefore, is based on internal administrative policy and should not be construed as a differentiation of investigation techniques or practices. These files, except for Confidential Informant Files, contain also adopted reports received from other agencies to include items that comprise, when indexed, individual records within the meaning of the Act. The central files maintained at DEA Headquarters include, in general, copies of investigative reports and most of the supporting documents that are generated or adopted by DEA Headquarters and field offices.

**Authority for maintenance of the system:** This system is established and maintained to enable DEA to carry out its assigned law enforcement and regulatory functions under the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513), Reorganization Plan No. 2 of 1973, and to fulfill United States obligations under the Single Convention on Narcotics Drugs.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** This system may be used as a data source or reference facility for numerous summary, management and statistical reports produced by the Drug Enforcement Administration. Only on rare occasions do such reports con-

tain identifiable individual records. Information contained in this system is provided to the following categories of users as a matter of routine use for law enforcement and regulatory purposes: A) Other Federal law enforcement and regulatory agencies; B) State and local law enforcement and regulatory agencies; C) Foreign law enforcement agencies with whom DEA maintains liaison; D) The Department of Defense and Military Departments; E) The Department of State; F) U.S. intelligence agencies concerned with drug enforcement; G) The United Nations; H) Interpol; I) To individuals and organizations in the course of investigations to elicit information.

In addition, disclosures are routinely made to the following categories for the purposes stated: A) To federal agencies for national security clearance purposes and to federal and state regulatory agencies responsible for the licensing or certification of individuals in the fields of pharmacy and medicine; B) To the Office of Management and Budget upon request in order to justify the allocation of resources; C) To State and local prosecutors for assistance in preparing cases concerning criminal and regulatory matters; D) To the news media for public information purposes; E) To respondents and their attorneys for purposes of discovery, formal and informal, in the course of an adjudicatory, rule making, or other hearing held pursuant to the Controlled Substances Act of 1970.

Release of information to the news media. Information permitted to be released to the news media and the public pursuant to 28 C.F.R. 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress. Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:** Administration regulations include detailed instructions for the preparation, adoption, handling, dissemination, indexing of individual records, storage, safeguarding of investigative reports and the accounting of disclosure of individual records.

#### Storage:

1. The Headquarters central files and the field office subsets of the Investigative Reporting and Filing System are maintained in standard file folders. Standard formats are employed. Manual indices are maintained using standard index record formats.

2. The Narcotics and Dangerous Drugs Information subset is stored electronically on the Department of Justice Information System separate from DEA Headquarters.

**Retrievability:** Access to individual records is gained by reference to either the automated or manual indices. Retrievability is a function of the presence of items in the index and the matching of names in the index with search argument names or identifying numbers in the case of the automated system. Files identified from field office indices are held by the field office and Headquarters. Files identified from the automated index may not be held by the interested office, but the originators of such files are identified. In addition a number of telecommunication terminals have been added to the existing network.

**Safeguards:** The Investigative Reporting and Filing System is protected by both physical security methods and dissemination and access controls. Fundamental in all cases is that access to investigative information is limited to those persons or agencies with a demonstrated and lawful need to know for the information in order to perform assigned functions.

1. Physical security when investigative files are attended is provided by responsible DEA employees. Physical security when files are unattended is provided by the secure locking of material in approved containers or facilities. The selection of containers or facili-

ties is made in consideration of the sensitivity or National Security Classification, as appropriate, of the files and the extent of security guard and/or surveillance afforded by electronic means.

2. Protection of the automated index is provided by physical, procedural and electronic means. The Master file resides on the Department of Justice Computer System and is physically attended or guarded on a full-time basis. Access or observation to active telecommunications terminals is limited to those with a demonstrated need to know for retrieval information. Surreptitious access to an unattended terminal is precluded by a complex sign-on procedure. The procedure is provided only to authorized DEA employees. For certain terminals, access is further restricted by cryptological equipment.

3. An automated log of queries is maintained for each terminal. Improper procedure results in no access. Terminals are signed-off after use. The terminals are otherwise located in locked facilities after normal working hours.

4. The dissemination of investigative information on an individual outside the Department of Justice is made in accordance with the routine uses as described herein or otherwise in accordance with the conditions of disclosure prescribed by the Act. The need to know of the recipient is determined in both cases by DEA as a prerequisite of the release.

**Retention and disposal:** Records contained within this system except for those in general files are retained for fifty-five (55) years. Records in general files are retained for twenty (20) years.

**System manager(s) and address:** Assistant Administrator for Enforcement; Drug Enforcement Administration; 1405 Eye Street, N.W., Washington, D.C. 20537.

**Record source categories:** A) DEA personnel; B) Cooperating individuals; C) Suspects and defendants; D) Federal, State and local law enforcement and regulatory agencies; E) Other federal agencies; F) Foreign law enforcement agencies; G) Business records by subpoena; H) Drug and chemical companies; I) Concerned citizens.

**Systems exempted from certain provisions of the act:** The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(1), (2), and (3), (e)(4)(G), (H), (e)(5) and (8), (f), (g), (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j) and (k). **Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** 1) The case files utilize standard file jackets and are retained in electronic, rotary power files; 2) The alphabetical and numerical index cards, as well as the docket cards, are retained in standard file cabinets.

**Retrievability:** The files and docket cards must be retrieved by file number. The file number can be ascertained from the alphabetical index if the name of any party to the suit is known.

**Safeguards:** Information contained in the system is unclassified. However, only attorneys who have their names recorded in the File Unit can be issued a case file. Minimal information about a case is provided from the various indices to telephone callers, since there is a problem with identifying the identity of a caller. If a party desires detailed information, he is referred directly to the attorney of record.

**Retention and disposal:** When a case file is closed by the legal section, it is sent to the Federal Records Center for retention in accordance with the authorized Record Disposal Schedule for the classification of the case. Such schedules are approved by the National Archives. After the designated period has passed, the file is destroyed. However, the index and docket cards are not purged.

**System manager(s) and address:** Assistant Attorney General; Civil Division; U.S. Department of Justice; 10th and Constitution Avenue, N.W.; Washington, D.C. 20530.

The request should include the file number and/or the names of any litigants known to the requestor. The requestor should also provide a return address for transmitting the information. The attorney, in turn, may require an official written request.

The request should clearly state, what information is being contested, the reasons for contesting it and the proposed amendment to the information sought.

**JUSTICE/CIV - 002**

**System name:** Civil Division Case File System: Customs Section

**System location:** 26 Federal Plaza, New York, New York 10007, and U.S. Department of Justice Data Services Center, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

**Categories of individuals covered by the system:** Any and all parties and counsel involved in the cases handled by the Customs Section of the Civil Division will have identifying data contained in this system.

**Categories of records in the system:**

1. The main record of the system is the case file which is retained on each case under the jurisdiction of the Customs Section of the Civil Division and constitutes the official record of the Department of Justice thereon. All record material relating to a case is retained in the file. Each file is assigned the Customs Court number given to the summons filed in that court or, in cases filed prior to October 1, 1970, to reappraisal appeals or to protests filed with the Customs Court.

The number assigned to the file will change to the number assigned by the Court of Customs and Patent Appeals, if that case becomes the subject of an appeal before that court. In addition, the Customs Section retains a log of communications received and communications sent. The correspondence is identified thereon by court (case) number, identification of the kind of communication, and the person receiving it.

2. The case file and communication logs are physically retained at the offices of the Customs Section, 26 Federal Plaza, New York, New York 10007. From these records, the Customs Section inputs certain information for conversion into a data processing system which is maintained at the Department of Justice Data Services Center, 10th and Constitution Avenue, N.W., Washington, D.C. 20530. Included in the information contained in the data processing system is the identity of the parties and their counsel, as well as the merchandise involved, the port of entry and the competing statutory provisions.

3. Alphabetical and numerical indices are maintained as a means of access to the proper file number by the cross-referencing of the names of non-government parties to suits with the appropriate file (court) numbers. These indices are made of index cards and maintained in the Chief Clerk's office in the Customs Section.

**Authority for maintenance of the system:** The Customs Section case files are maintained under the authority of 28 U.S.C. 2601(b) and 2632(e) and established in accordance with 28 C.F.R. 0.45(c) which gives the Civil Division responsibility for 'all litigation incident to the reappraisal and classification of imported goods, including the defense of all suits in the Court of Customs and Patent Appeals', and with 28 C.F.R. 0.48 which designates the Chief, Customs Section, to accept service of notices of appeals to the Court of Customs and Patent Appeals and all pleadings and other papers filed in the Customs Court, when the United States is an adverse Party in any customs litigation'.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Any record pertaining to

any case or matter in the Civil Division may be disseminated to any other component of the Department of Justice, including the Federal Bureau of Investigation and the United States Attorney offices, for use in connection with the consideration of that case or matter or any other case or matter under consideration by the Civil Division or any other component of the Department of Justice.

Certain information contained in the record may also be disseminated to the U.S. Customs Service, the Department of the Treasury, the International Trade Commission, the Department of State, or any other agency of the Government whose decision is being challenged in a case assigned to the Customs Section for disposition. A record maintained in this system of records may be disseminated as a routine use of such record as follows: (1) in any case in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, the record in question may be disseminated to the appropriate Federal, state, local or foreign agency charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law; (2) in the course of investigating the potential or actual violation of any law, whether civil, criminal or regulatory in nature, or during the course of a trial or hearing, or the preparation for a trial or hearing for such violation, a record may be disseminated to a Federal, state, local or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual or organization possesses information relating to the investigation, trial or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant; (3) a record relating to a case or matter may be disseminated in an appropriate Federal, state, local or foreign court or grand jury proceeding in accordance with established constitutional, substantive, or procedural law or practice; (4) a record relating to a case or matter may be disseminated to a Federal, state, or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing; (5) a record relating to a case or matter may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion of such matters as settlement of the case or matter, plea bargaining, or formal or informal discovery proceedings; (6) a record relating to a case or matter that has been referred by an agency for investigation, prosecution, or enforcement, or that involves a case or matter within the jurisdiction of an agency, or where the agency or officials thereof are a party to litigation or where the agency or officials may be affected by a case or matter, may be disseminated to such agency to notify the agency of the status of the case or matter or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter; (7) a record relating to a person held in custody pending or during arraignment, trial, sentence or extradition proceedings, or after conviction or after extradition proceedings, may be disseminated to a Federal, state, local or foreign prison, probation, parole, or pardon authority, or to any other agency or individual concerned with the maintenance, transportation, or release of such a person; (8) a record relating to a case or matter may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement; (9) a record may be disseminated to a Federal, state, local, foreign, or international law enforcement agency to assist in the general crime prevention and detection efforts of the recipient agency or to provide investigative leads to such agency; (10) a record may be disseminated to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information relates to the requesting agency's decision on the matter; (11) a record may be disseminated to the public, news media, trade associations, or organized groups, when the purpose of the dissemination is educational or informational, provided that the record does not contain any information identifiable to a specific individual other than is necessary to identify the matter or where the information

**Release of information to the news media:** Information permitted to be released to the news media and the public pursuant to 28 C.F.R. 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**Retrievability:** (1) The case files must be retrieved by number. The file number may be ascertained from the alphabetical index when the name of any non-government litigant is known. (2) The information contained in the data processing system may be retrieved through the retrieval tool activated by an attorney making a request for a report to the computer technician who codes the request on a form in the format of the retrieval language. The action words of the retrieval reports are: List - lists the case numbers of the cases which satisfy certain criteria such as plaintiff's name, counsel's name, court number, merchandise, competing statutory provisions, Government counsel. In the attorney's absence, another attorney covering for the absent attorney or the Chief of the Section may respond to the telephone call or correspondence. The index files and the communication logs are utilized only by the personnel of the Customs Section in locating or verifying information contained in the system. (2) Periodically, the inactive cases will be purged from the main tape in the data processing system and transferred to the historical tape where the information will be retained indefinitely. There is a provision in the data processing system to delete and remove an entire case history from the main or historical tape. This may be done on request from the Chief of the Customs Section and such removed cases will not be saved or written on any other tape.

All requests for records should be made to the appropriate regional office or Headquarters at the following addresses: United States Parole Commission; Scott Plaza II; Industrial Highway; 6th Floor; Philadelphia, Pennsylvania 19113; United States Parole Commission; 3500 Greenbriar Parkway, Bldg. 300; Atlanta, Georgia 30331; United States Parole Commission; 320 First Street; Washington, D.C. 20537; ATTN: National Appeals Board; United States Parole Commission; KCI Bank Bldg; 8800 N.W. 112th Street; Kansas City, Missouri 64153; United States Parole Commission; 3883 Turtle Creek Blvd. Suite I; Dallas, Texas 75219; United States Parole Commission; 330 Pramrose Drive - 5th Floor; Burlingame, Calif. 94010.

**Categories of individuals covered by the system:** Current and former inmates under the custody of the Attorney General who have become eligible for parole. Former inmates includes those presently under supervision as parolees or mandatory releasees and those against whom a revocation warrant has been issued.

**Categories of records in the system:** (a) Docket Sheets - Each region and the National Appeals Board in Washington maintain a cumulative series of Docket sheets in time sequence showing Commission Action. Principal data elements are name and register number of inmate, offense, sentence, and previous and present Action. The Appeal Docket includes the date and type of appeal in addition to much of the above data. These provide a continual running record of the basic data elements per inmate and former inmate. (b) Hearing Schedules - When inmates become eligible for parole through operation of law, their names appear on an eligibility list prepared by the Bureau of Prisons, for initial parole hearings. Inmates denied parole are 'continued' by the Commission to future dates for review hearings or record reviews. There is a legal requirement for record reviews of certain inmates at the 1/3 point of their sentences. Other types of hearings and reviews are provided for in the Code of Federal Regulations as part of parole rescission or revocation procedures. All of the different types of hearings and reviews are placed on schedules for panels of examiners to process when they visit the various institutions or hold 'local' hearings. The data elements are similar to those on the docket but indicate the number and type of hearing or review to be held instead of the result.

**Authority for maintenance of the system:** 18 U.S.C. 4201-4218, 5005-5041, 28 C.F.R. Part O, Subpart V, and 28 C.F.R. Part-2.

(a) The dockets provide the basis of answering basic inquiries, mostly from within the Parole Commission, as to when a hearing came up for an individual and what action was taken. The schedules indicate to examiners and prison staff the specific hearings and reviews to be prepared for and held.

(b) In the event that material in this system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be referred to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(c) A record from this system of records may be disclosed to a federal, state or local agency maintaining civil, criminal or other relevant information if necessary to obtain information relevant to an agency decision concerning parole matters.

(d) A record from this system may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

(e) Internal Users - Employees of the Department of Justice who have a need to know the information in the performance of their duties.

(f) External Users - As noted above, on occasion employees of federal, state and local enforcement, correctional, prosecutive, or other agencies, and courts may have access to this information.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

(a) The file is the "working tool" used by Parole Commission examiners to frame the questions at the inmates initial hearing. After that hearing, it is placed in the appropriate regional office where it provides the principle information source for decisions necessary during the pre-release stage (before parole), the review hearing or record review, and the post release stage (when supervision takes place). It is sent temporarily to Commission Headquarters when appeals come before the National Appeals Board or when needed by

Counsel and others on the Headquarters Staff. It is used by employees at all levels including Commission Members to provide the information for decision making in every area of Commission responsibility. Files of released inmates are used to make statistical studies of subjects related to parole and revocation.

(b) The system is used to provide information source to officers and employees of the Department of Justice who have a need for the information in the performance of their duties.

(c) The system is used to provide information source for disclosure of information that are matters solely of general public record, such as offense, sentence data, release date, and etc. Names are not disclosed when information is so provided.

(d) The system is used to provide informational source for responding to inquiries from federal inmates involved, their families or representatives, or Congressional inquiries.

(e) Internal Users - Employees of the Department of Justice who have a need to know information in the performance of their duties.

(f) External Users - U.S. Probation Officers, who supervise parolees and mandatory releasees, and U.S. District Court judges on rare occasions when Commission action is attacked in litigation. Very rarely, to enforcement authorities outside of the Department of Justice.

(g) In the event that material in this system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be referred to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order, issued pursuant thereto.

(h) A record from this system may be disclosed to a federal, state or local agency maintaining civil, criminal or other relevant information if necessary to obtain information relevant to an agency decision relating to current or former inmates under supervision.

(i) A record from this system may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

**Release of information to the news media:** Information permitted to be released to the news media and the public pursuant to 28 C.F.R. 50.2 may be made available from systems of records maintained by the U.S. Parole Commission unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**Release of information to Members of Congress:** Information contained in systems of records maintained by the U.S. Parole Commission, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and with the consent of the individual who is the subject of the record.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Information maintained in the system is stored on papers fastened into file jackets and a minimal amount is on cards stored in card file drawers. Active files and card indices are located in each region; inactive files are at the Washington Federal Records Center and the card index to inactive files is at Board Headquarters in Washington. An experimental program to store such data on tape, disk or microfiche using ADP technology is in the beginning stages.

**Retrievability:** All data is indexed by name and/or register number. When ADP technology is used in the future, such data may be available by Social Security Number, FBI identification number, or other indices.

**Safeguards:** Within the Department of Justice, routine use is made available to employees only on a "need to know" basis. Files are stored in rooms which are supervised by day and locked at

night. Data from files for recipients outside of the Parole Commission and Bureau of Prisons is conveyed by letter so that a record exists. When files are sent they are covered by a letter with a follow-up on return of the file. Such disclosure is infrequent, and is within the federal enforcement-prosecution-judicial area only.

**Retention and disposal:** Records in this system are retained for a period of ten (10) years after expiration of sentence, then destroyed by electronic means or shredding.

(d) A record from this system of records may be disclosed to a federal, state or local agency maintaining civil, criminal or other relevant information if necessary to obtain information relevant to Parole Commission matters.

(e) A record from this system may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that information is relevant and necessary to the requesting agency's decision on the matter.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 C.F.R. 50.2 may be made available from systems of records maintained by the U.S. Parole Commission unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress: Information contained in systems of records maintained by the U.S. Parole Commission not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and with the consent of the individual who is the subject of the record.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Paper input forms are stored in folders only until information from them is punched into cards. Data is stored principally on punch cards and plans are being developed to convert it to tape storage. Monthly and quarterly reports in the form of computer printouts are filed in folders. Annual report is in book form and stored in library shelves.

**Retrievability:** Data in this system can be retrieved by inmate's name and register number from the original input forms, IBM card decks, and planned tape substitute for card decks. It is only retrieved by region, by examiner, by type of decision made or hearing held, by relation to the guidelines and other similar means except for individual case retrievability in the guideline section of the quarterly report. Except for this, there is no output from this system now produced in which any information is identifiable by the name or register number of any person. Such identification exists in the input and storage data area.

**Safeguards:** Data on forms and IBM cards and/or tape retrievable by individual is stored in the Research Sections Office in cabinets. Research personnel (all selected Commission employees) supervise this data by day and use it on a 'need to know' basis. The room where it is stored is locked outside of office hours, and the entire Headquarters building is guarded and secured. Monthly and quarterly reports are for use of the Chairman, his Executive Assistant and Commission Members and professional personnel. No information thereon is retrievable as pertaining to any individual except certain breakouts by Parole Commission employee examiners and by inmate in the guideline section of the quarterly reports. These printouts are stored in the Commission Headquarters offices, all of which are supervised by day, locked at night, and are in a secured building. The Annual Report contains no information identifiable by individual and is a public document.

**Retention and disposal:** Completed input forms - Until data is keypunched into IBM cards - usually one month after forms are completed. They are then destroyed; 2. IBM card decks or planned tape substitute - Ten years after preparation, cards will be destroyed - tape degassed; 3. Printouts of annual and quarterly reports - 10 years; 4. Annual Reports - Some copies retained perpetually in Archives.

**System manager(s) and address:** Executive Assistant to the Chairman; Rm. 354-B; U.S. Parole Commission; 320 First Street, N.W.; Washington, D.C. 20537.

**Record source categories:** (a) Commission inmate files; (b) Docket sheets; (c) Commission notices of action, orders and documentation following hearings; (d) Commission warrant applications and warrants; (e) General Commission records and data.

**Systems exempted from certain provisions of the act:** The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(2) and (3), (e)(4)(G) and (H), (e)(8), (f) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a (j)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the Federal Register.

#### 1. Computer Centers

- a. The criminal justice agency computer site must have adequate physical security to protect against any unauthorized person gaining access to the computer equipment or to any data stored on the equipment.
- b. Since personnel at computer centers can access data stored in the system, they must be screened thoroughly under the authority and supervision of an NCIC control terminal agency. Authority and supervision may be delegated to responsible criminal justice agency personnel in the case of a satellite computer center being serviced through a state control terminal agency. This screening will also apply to non-criminal justice maintenance or technical personnel.

- d. Computers having access to the NCIC must have the proper computer instructions written and other built-in controls to prevent criminal history data from being accessible to any terminals other than authorized terminals.
- e. Computers having access to the NCIC must maintain a record of all transactions against the criminal history file in the same manner the NCIC computer logs all transactions. The NCIC identifies each specific agency entering or receiving information and maintains a record of those transactions. This transaction record must be monitored and reviewed on a regular basis to detect any possible misuse of criminal history data.
- f. Each state control terminal shall build its data system around a central computer through which each inquiry must pass for screening and verification. The configuration and operation of the center shall provide for the integrity of the data base.

#### 2. Communications

- a. Lines/channels being used to transmit criminal history information must be dedicated solely to criminal justice use, i.e., there must be no terminals belonging to agencies outside the criminal justice system sharing these lines/channels.

- b. The agencies having terminals with access to criminal history must have terminal operators screened and restrict access to the terminal to a minimum number of authorized employees.

- c. Copies of criminal history data obtained from terminal devices must be afforded security to prevent any unauthorized access to or use of that data.
- d. All remote terminals on NCIC Computerized Criminal History will maintain a hard copy of computerized criminal history inquiries with notations of individual making request for record (90 days).

**Retention and disposal:** Unless otherwise removed, records will be retained in file as follows:

1. Vehicle File

#### Record access procedures:

It is noted the Attorney General is exempting this system from the access and contest procedures of the Privacy Act. However, the following alternative procedures are available to a requester. The procedures by which an individual may obtain a copy of his Computerized Criminal History are as follows:

If an individual has a criminal record supported by fingerprints and that record has been entered in the NCIC CCH File, it is available to that individual for review, upon presentation of appropriate identification, and in accordance with applicable state and Federal administrative and statutory regulations.

Appropriate identification includes being fingerprinted for the purpose of insuring that he is the individual that he purports to be. The record on file will then be verified as his through comparison of fingerprints.

**Procedure:** 1. All requests for review must be made by the subject of his record through a law enforcement agency which has access to the NCIC CCH File. That agency within statutory or regula-

tory limits can require additional identification to assist in securing a positive identification.

2. If the cooperating law enforcement agency can make an identification with fingerprints previously taken which are on file locally and if the FBI identification number of the individual's record is available to that agency, it can make an on-line inquiry of NCIC to obtain his record on-line or, if it does not have suitable equipment to obtain an on-line response, obtain the record from Washington, D.C., by mail. The individual will then be afforded the opportunity to see that record.

3. Should the cooperating law enforcement agency not have the individual's fingerprints on file locally, it is necessary for that agency to relate his prints to an existing record by having his identification prints compared with those already on file in the FBI or, possibly, in the State's central identification agency.

**Contesting record procedures:** The subject of the requested record shall request the appropriate arresting agency, court, or correctional agency to initiate action necessary to correct any stated inaccuracy in his record or provide the information needed to make the record complete.

**Record source categories:** Information contained in the NCIC system is obtained from local, state, Federal and international criminal justice agencies.

**Systems exempted from certain provisions of the act:** The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(1), (2) and (3), (e)(4)(G), (H), (e)(8), (f), (g) and (m) of the Privacy Act pursuant to 5 U.S.C. 552a (j). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the Federal Register.

#### Categories of records in the system:

The FBI Central Records System - The FBI utilizes a central records system of maintaining its investigative, personnel, applicant, administrative, and general files. This system consists of one numerical sequence of subject matter files, an alphabetical index to the files, and a supporting abstract system to facilitate processing and accountability of all important mail placed in file. Files kept in FBI field offices are also structured in the same manner, except they do not utilize an abstract system.

The FBI has 198 classifications used in its basic filing system.

They pertain primarily to Federal violations over which the FBI has investigative jurisdiction. However, included in the 198 classifications are personnel, applicant, and administrative matters to facilitate the overall filing scheme. These classifications are as follows (the word 'obsolete' following the name of the classification indicates that documents are no longer being filed under this heading):

Files kept in FBI Field Offices - Field offices maintain certain records that are not contained at FBI Headquarters that include files, index cards, and related material pertaining to cases in which there was no prosecutive action undertaken; perpetrators of violations not developed during investigation; or investigation revealed allegations were unsubstantiated or not within the investigative jurisdiction of the Bureau. These investigations were closed in field offices and correspondence not forwarded to FBI Headquarters. Duplicate records and records which extract information reported in the main files are also kept in the various divisions of the FBI to assist them in their day-to-day operation. These records are lists of individuals which contain certain biographic data, including physical description and photograph. They may also contain information concerning activities of the individual as reported to FBIHQ by the various field offices. The establishment of these lists is necessitated by the needs of the Divisions to have immediate access to pertinent information duplicative of data found in the Central Records without the delay caused by a time-consuming manual search of central indices. The manner of segregating these individuals varies depending on the particular needs of the FBI Division. The information pertaining to individuals who are a part of the list is derivative of information contained in the Central Records System. These duplicative records fall into the following categories:

- (1) Listings of individuals used to assist in the location and apprehension of individuals for whom legal process is outstanding (fugitives);
